Ridha Mejri

Because of my illness, Ridha took a 30-SWS Business and Technical English of seventh semester Business Engineering Bachelor students at Hochschule Mannheim in March 2017.

Coordinating with Ridha before, during and after the programme was very easy, and he approached the work in a pleasant but professional manner. Students who took the class said they enjoyed it and they learned a lot.

The content of this level B2 course was:

Company structure and organisation
Vocabulary from IT, production, logistics and metal engineering
Numbers and letters
Statistics
Marketing
Finance
Describing objects, processes and function
Properties of materials
Problems and solutions
Small talk

All of these involved students communicating a lot with each other and the teacher in English.

John Clear, Mannheim, 04.04.2017
